Lift Regulations Conformity to Type (Module C2)

No. UKCA 713085

This Certificate of Conformity to type with random checking is the part of the conformity assessment procedure whereby a approved body carries out checks on safety components for lifts to ensure that they are in conformity with the approved type as described in the type examination certificate and satisfy the applicable requirements of Schedule 1 of Lift Regulations 2016 and will enable a lift in which they are correctly incorporated to satisfy those requirements.

The following list of safety components are covered at the site as detailed on page one of this certificate and additional manufacturing sites as detailed below as part of the conformity assessment procedure:
